PROFESSIONAL SUMMARY

Data & Business Analyst with **3+ years of experience** delivering end-to-end **business intelligence solutions**, **operational analytics** frameworks, and **data-driven decision support** across **banking, hospitality, and supply chain** domains. **Ranked #1 among 50+ managers** for **404% KPI** attainment, **reduced** operational risk by **88%**, drove **38% revenue** uplift MOM via **financial audit protocols**, and **cut customer dissatisfaction by 73%** through **CX analytics**. Proficient in **SQL** (CTEs, Window Functions), **Power BI** (DAX, Star Schema, RLS), **Python** (Pandas, NumPy), and **Advanced Excel**. Adept at translating **complex data into executive dashboards, MIS reports, and actionable business insights**. Google Data Analytics Certified | NASSCOM FutureSkills Prime Gold (91%) | Scrum Fundamentals Certified

SKILLS

Analytics & BI: Power BI (DAX, Data Modeling, Star Schema, Row-Level Security), Tableau, MIS Reporting, KPI Scorecards, Trend Analysis, Cohort Analysis, Funnel Analysis, Variance & Root Cause Analysis

Programming & Data Engineering: SQL (PostgreSQL, MySQL, CTEs, Window Functions, Subqueries, Indexing, EXPLAIN ANALYZE), Python (Pandas, NumPy), ETL Pipelines, Data Cleansing & Transformation, Schema Design

Advanced Excel & Automation: VBA/Macros, Power Query, Pivot Tables, Multi-source Reconciliation, Automated MIS Frameworks, VLOOKUP/INDEX-MATCH

Customer Experience & Operations: CX Sentiment Tracking, CSAT / NPS Analytics, SLA Monitoring, Stakeholder Management, Process Documentation, CRM Data Support

Domain Knowledge: Banking Analytics (Credit Risk, DTI, Portfolio Segmentation), Revenue Assurance & Audit, Data Governance & Compliance, First Time Right (FTR) Quality Frameworks

Tools & Platforms: Power BI Desktop & Service, Tableau, MySQL Workbench, PostgreSQL, Jupyter Notebook, Git/GitHub, MS Office Suite

WORK EXPERIENCE

AI Variant | Business Analyst

Mar 2026 – Jun 2026

- Engineered an end-to-end workforce analytics model across a **100,000-record** enterprise dataset, diagnosing attrition drivers and identifying promotion stagnation and compensation disparity as primary risk factors behind a **50.21% churn rate** across **6 departments**.
- Designed interactive **Tableau and Power BI executive dashboards** with multi-tier drill-downs, cross-departmental attrition-vs-income models, and high-risk unit visualizations surfacing the R&D department as the highest-risk unit at **51.2% attrition**.
- Architected cross-platform data validation strategies across **SQL, Excel, Python, and Power BI** pipelines, achieving **100% consistency** in analytical outputs and ensuring **First Time Right (FTR)** accuracy across all deliverables.
- Performed granular **funnel analysis** on workforce lifecycle stages (Hiring → Onboarding → Performance → Exit) to identify intervention points, enabling targeted **retention strategy** recommendations.

OYO (DanCenter A/S) | Senior Executive

Jun 2024 – Jan 2026

- Built an automated real-time inventory and booking exception monitoring engine using **Advanced Excel (Power Query)**, refreshing hourly data feeds and flagging high-risk reservation conflicts reducing **check-in denial rate by 88%** and sustaining operational **error rates below 3%**.
- Maintained a centralized **Customer Experience (CX) MIS** tracking framework in collaboration with **50+ hotel property managers** to systematically monitor guest dissatisfaction drivers across service touchpoints, achieving a **73% reduction in Unhappy Score** and driving measurable **CSAT** improvement.
- Developed a **Realization Tracker** and comprehensive **FinOps audit protocol** to identify portfolio billing leakage and unbilled stays, driving a **38% uplift** in monthly portfolio realized revenue through systematic **variance analysis**.
- Implemented a **maker-checker audit framework** for partner transactions, monitoring unauthorized guest charges and overcharging complaints eliminating billing disputes by **95%+** and enabling operational scaling from **1 to 12 company-serviced properties**.
- Maintained strict **SLA compliance** and operational KPI documentation across the Odisha Business Unit; earned **'Best Senior Executive'** for two consecutive quarters among **50+ managers** with **404% KPI attainment**.
- Created **automated Excel-based dashboards** and weekly executive reports tracking realization rates, booking trends, and property performance reducing manual **reporting effort by approximately 65%**.

- Managed end-to-end daily operations across a **25-member team**, overseeing supplier procurement, vendor coordination, inventory control across a **₹20L+ stock base**, and order fulfilment for **~200 daily transactions**.
- Built structured **Excel reconciliation reports** to track inventory movement, supplier payments, and stock discrepancies reducing unaccounted **stock variance** and improving **procurement accuracy**.
- Coordinated **cross-functional workflows** between kitchen, service, and procurement teams to optimize order turnaround time and maintain consistent **service delivery SLAs**.

PROJECTS

Aurora Bank: Credit Portfolio Risk Segmentation & Transaction Failure Diagnostics

[Project Link](#)

Tools: Python, MySQL, Power BI (DAX, Star Schema, RLS), ETL

- Analysed **157K+ banking transactions** across **2,000 credit card accounts**, engineering a two-pillar credit risk segmentation model using **Debt-to-Income (DTI)** ratio and credit limit exposure flagging **22% of the portfolio as 'High Risk'**.
- Diagnosed a **1.74% transaction failure rate**, isolating **'Insufficient Balance'** as the primary error driver and identifying critical risk concentration within the **Mastercard portfolio (~50% of failures** despite highest credit limits).
- Built an automated **Power BI semantic model** with **Python-based ETL pipeline**; implemented **Row-Level Security (RLS)** to enforce role-based data governance across **Executive, Risk Analyst, and Relationship Manager** views.
- Designed a **star schema data model** with **DAX-calculated measures** for **real-time KPI tracking**: transaction volume trends, spend patterns, risk tier distributions, and portfolio health metrics.

Apple Retail: Enterprise-Scale Data Quality Audit & Sales Intelligence Pipeline

[Project Link](#)

Tools: MySQL, Advanced SQL (CTEs, Window Functions, Indexing, EXPLAIN ANALYZE)

- Designed a normalized **5-table relational database schema** and imported **1M+ transaction records** spanning **75 global Apple retail stores** across 5 years (2019–2024).
- Executed a structured **data quality audit**, identifying and removing **493K invalid sales records** and **2,511 warranty anomalies** using systematic validation queries improving **data integrity by ~49%**.
- Optimized complex analytical **query execution times by 70%** through strategic **B-tree indexing**, composite indexes, and virtual computed columns with **EXPLAIN ANALYZE** profiling.
- Answered **23 strategic business questions** spanning sales velocity, warranty claim patterns, product lifecycle, and store performance benchmarking using **CTEs, Window Functions (RANK, DENSE_RANK, LAG, Running SUM)**, and multi-table **JOINS**.

Post-COVID Freight Disruption: Cost Index Modeling & Margin Sensitivity Analysis

[Project Link](#)

Tools: Advanced Excel, Data Modeling, Real-Time API Integration (FRED API), Sensitivity Analysis

- Modelled **20+ years** of global sea vs. air freight index data (2003–2026) sourced from **FRED API** to quantify post-COVID supply chain cost disruption demonstrating that freight costs remain **36% above 2019 baseline** with blended cost inflation of **61.75%**.
- Engineered a dynamic **margin sensitivity model** illustrating how freight cost shocks compress gross operating margins from **20% to 7.65%**, providing a **decision-ready pricing** and **sourcing framework** for executive stakeholders.
